Behrad Ravanbod

DevOps Engineer

I have experience in designing DevOps pipelines and automating the tasks. I manage Linux servers, I use Kubernetes & Docker for containerized environments, Jenkins for setting up the CI/CD pipelines, Ansible & Bash for automating the tasks, Prometheus, and some other tools for monitoring & logging.
I started programming in 2013. I have experience in languages like Golang, Python & PHP in the IT industry. I am familiar with common software principles like SOLID, Design patterns and I used them in many projects.

WORK EXPERIENCE

DevOps Engineer
Payrad Smart Solutions (paybaar.com, panel.baradplat.com)
2022 - present
- Setup and manage Kubernetes clusters
- Improve CI/CD pipelines speed and efficiency by improving Dockerfiles
- Develop ticketing system (Python-Flask) for whole company to communicate between teams (Create Jira cards automatically in Mattermost UI)
- Setup RabbitMQ cluster in k8s
- Worked with Graylog to store the logs of apps
- Setup Redis-Sentinel for many projects
- Setup monitoring and alerting system for the new projects
- Improve the laravel projects (tune PHP-FPM, Nginx & …)
- Redesign the CI/CD of Node.js & React.js projects (Increase and Stabilize project integrations)
- Migrated many projects to the new Datacenter
- Set up ElasticSearch cluster to increase performance of the Applications
- Migrated old MySQL databases to PostgreSQL using pgLoader
- Involve in designing the system

DevOps Engineer & Backend Developer
Apex team (apexteam.net)
2019 - 2022
- Managed & maintained Linux servers.
- Migrated legacy projects into Docker containers.
- Designed CI/CD pipelines using Jenkins & Gitea.
- Set up monitoring & logging services using Prometheus, Loki, Fluent bit & Grafana.
- Set up load balancing service using HAProxy.
- Set up Wireguard for internal usages.
- Created Automated tasks for Setting up the DevOps tools (CI/CD, load balancers & monitoring systems) using Ansible, Python & Docker-compose.

EDUCATION

Hamedan University of Technology
Bachelor of Science, Computer Software Engineering
2019 – 2023

TECHNICAL SKILLS

- **Programming languages**
Golang, Python, C++, PHP, Java
- **Operating System**
Linux, Bash Scripting, Services configurations & …
- **Container & Container Orchestration tools**
Kubernetes, Docker, Docker-compose
- **Cloud Providers**
AWS
- **Databases & Search Engines**
MySQL, Redis, ProxySQL (MySQL load balancer), PostgreSQL, ElasticSearch, Metabase
- **Web Servers & Load balancers & HA tools**
Nginx, HAProxy, Keepalived, Apache
- **CI/CD tools**
Jenkins, Gitlab CI
- **Monitoring & logging tools**
Prometheus, Graylog, Loki, Fluent bit, Grafana,
- **Git Servers (Self-hosting solutions)**
Gitea, GitLab Community Edition
- **Infrastructure & Configuration as Code tools**
Ansible, Terraform

A FEW OF OPEN-SOURCE ACTIVITIES

- **Docker-CheatSheet** (Maintainer)
A docker cheat sheet and some examples
https://github.com/ravanbod/docker-cheatsheet
- **Terraform Awesome** (Contributor)
One of the completest Terraform repositories for providers, examples, tools, etc.
https://github.com/ravanbod/terraform-awesome
- **DevOps-Roadmap** (Contributor)

- Set up database load balancing using ProxySQL for MySQL. (Master-Slave pattern)
- Designed backup systems (collecting the data & uploading in ArvanCloud object storage)
- Developed services using Golang (gin) & Python (flask).
- Used Redis as a cache layer for some services.

Backend Developer
Freelance
2016 - 2019
- Designed Some APIs using PHP & Python.
- Migrated services into Docker containers.

Teaching Assistant
Hamedan University of Technology
2020 - 2023
- Taught C++ & Java to new students.
- Created a judging system using Golang for submissions. (Automated compiling & running submissions in the docker containers)
- Created a notification system for LMS using Golang.

DevOps Roadmap for learning
https://github.com/ravanbod/devops-roadmap
- **Private Push Notification** (Maintainer)
A project that has a backend-side (python) and an android library for the client-side. I Used socket programming for the first time in this project.
https://github.com/ravanbod/ppn-server-python
https://github.com/ravanbod/ppn-client-android
